SHOW and Tell:

Mike Zinser brought one bowl made from spalted maple finished with 8 coats of minwax antique oil. He had a second bowl made from hack berry with a large crack.

David Sapp Showed a bowl and a platter made from ambrosia maple and a few segmented ornamental pieces made of walnut and maple.

Paul Jalbert had a plaque for Slinger family featuring Marine Corp insignia. Carved from cherry with sanding sealer and finish to be determined later.

John Hartin displayed 2 natural edge bowls one with legs. He explained how he got legs on the bowl.

Loyd Ackerman brought a small shelf made of walnut with a horse displayed made with CNC.

Gary Runyon showed a Roman support spindle he made for his wife. It is made of cherry and finished with Dr. Wood-shop finish.

Larry Wendland displayed 2 small natural edge bowls made with macadamia nut and finished with CA glue.

Tony Murphy showed a marking gauge he made to use. Made with walnut and finished with poly.

Richard Gulley had an item he asked if anyone could identify. He also showed a small item which had a hole in the middle. He said you put your finger in the hole to hold down book pages as you read.

Program: David Sapp - End-Grain Cutting Board

David took members through procedures for making the cutting board. He explained that after the passing of his brother he has been working with his brothers business in Missouri making shuffle boards. He showed slides of the shuffle boards being made.

David explained how he got the 18 strips of maple for the cutting boards and how to prepare them. He demonstrated the gluing process and told of passing them through planner. David showed how to clamp strips together and told of sanding and use of router. He had a number of products for finishing as you want one easily renewable.

He reminded all don't cut crosscut on a table saw.

David showed the finished product and answered questions.

Meeting adjourned.
